

## EXHIBITORS

### 3S Media

### Booth 9

IMESA Magazine gives critical insight into infrastructure development, maintenance and service delivery. The related industry website [www.infrastructurene.ws](http://www.infrastructurene.ws) gives readers daily, up-to-date news. It is the official magazine of the Institute of Municipal Engineering of Southern Africa (IMESA). IMESA is published by 3S Media – 53 years of publishing excellence.

### Amanzi Starway

### Booth 69

Manufacturers of HDPE spirally wound, steel reinforced pipes, specializing in producing high quality, cost effective drainage and sewerage pipes with SABS mark of approval and South African National Standard (SANS 674:2011). We also have South African Patent (2006/02154) for our pipe and the manufacturing technology of the pipe. Starway steel reinforced HDPE pipe is the perfect combination of HDPE and steel which can meet various demands of the different project applications. Our factory is based in East London and since establishing in 2008 we have seen significant growth.

**BMK Engineering Consultants****Booth 27**

BMK Engineering Consultants is a well-established, future focused company, making us leaders of tomorrow in the varied engineering disciplines. We are geared towards offering a professional service in the Civil Engineering sector and have built a reputation for service excellence. BMK Engineering Consultants is a highly skilled and competence engineering practice that draws on its diverse talents to deliver a professional service to its clients. Given the strong technical and engineering background of its staff, BMK Engineering Consultants are capable of delivering quality services industry relating to; Flood Studies, Transportation, Water and Sanitation, Storm water Management, Project and Construction Management, Civil and Structural Engineering, Urban and Infrastructure Development.

**CIDB****Booth 90**

DEVELOPMENT THROUGH PARTNERSHIP

The cidb is established in terms of the Construction Industry Development Board Act 38 of 2000 to provide strategic leadership to construction stakeholders to stimulate sustainable growth, reform and improvement of the construction industry. Among others, the Act mandates the CIDB to:

- promote sustainable growth of the construction industry and the sustainable participation of the emerging sector
- promote uniformity in construction procurement and to
- establish the Registers of Contractors and of projects to systematically regulate and monitor the performance of the industry and its stakeholders for sustainable growth, delivery and empowerment.

The cidb has a footprint in all provinces.

## Denso

## Booth 5 & 6

Winn & Coales (Denso) Ltd have established an international reputation for the reliability of their anti-corrosion and sealing systems. Suppliers to public utilities, industrial concerns and do-it-yourself customers worldwide. The company was established in the UK in 1883 and have been at the forefront of the anti-corrosion, weatherproofing and sealing technology for over 120 years. With eight following subsidiary companies worldwide, Winn & Coales (Denso) Ltd is able to draw upon a wealth of experience in producing products to deal with corrosion and sealing problems in many types of environment. The acquisition and creation of subsidiary companies specializing in the many sectors of this technology is an ongoing activity for parent company Winn & Coales International. The sharing of knowledge and new technology plus extensive research and development facilities enable the company to maintain its policy of producing high quality effective products around the world backed by a prompt and efficient service.

Denso South Africa (Pty) Ltd has a well-established manufacturing facility in Durban, and manufactures products for the South African, African and international export markets. All the products are made to Winn & Coales (Denso) Ltd specifications. A full product brochure is available on request.

## Department of Public Works Booth 36 & 37

Department of Public Works: Expanded Public Works Programme  
The infrastructure sector is led by the Department of Public Works (DPW). The Department also collaborates with the Departments of: Transport; Cooperative Governance and Traditional Affairs; Water Affairs; Mineral Resources; and Energy. The Infrastructure sector involves the use of labour-intensive methods in the construction and maintenance of public sector funded infrastructure projects. Labour intensive infrastructure projects under the EPWP entail;

- using labour-intensive construction methods to provide work opportunities to local unemployed people
- providing training and skills development to the locally unemployed people
- building cost effective quality assets.

Most projects are implemented by the provinces and municipalities. While all provinces and 99% of municipalities are already contributing to the EPWP, many provincial departments and municipalities could increase their contribution further.

The continued growth of the sector will depend to which some of the underperforming provinces and municipalities can increase their performance by implementing their projects more labour intensively and by establishing dedicated labour intensive maintenance programmes which have the potential to provide regular employment to large numbers of people, especially in rural areas. EPWP infrastructure sector programmes. The key EPWP infrastructure programmes include:

- Vuk'uphile
- National Youth Service

- Large Projects
- Provincial Roads.

### DPI Plastics

Booth 80 & 81

**Type of product or service:** PVC and HDPE pipe and fittings systems for water reticulation and conveyance servicing the civil infrastructure, construction, plumbing, mining and agricultural sectors.

**Type of operation:** Manufacturer

**Regions covered:** Sub-Saharan Africa

**Countries of operation:** DPI Plastics factories are located in JHB and Cape Town, South Africa. Joint venture or subsidiary factories are based in Angola (Fibrex), Tanzania (DPI Simba), Namibia (Namibia Plastic Convertors), Botswana (Pipex) and Mauritius (Aqualia-DPI). Additional stockpoints (AST/Africa Saffer Trading) are in the DRC, Mozambique, Nigeria, Zimbabwe and Zambia.

**Ownership:** Owned 100% by DAWN – listed in the Construction and Materials sector of the JSE

**Memberships and associations:** Southern African Plastic Pipe Manufacturers Association (SAPMA), Southern Africa Vinyls Association (SAVA), Water Institute of SA (WISA), Institute of Municipal Engineering SA (IMESA), SA Irrigation Institute (SABI)

**Listings:** ISO 9001 and OHSAS 18001

**B-BBEE:** Level 3 B-BBEE certified

### EPA Survey

Booth 38

EPA Survey is a mine practice survey utilising state of the art technologies such as GPS, robotic total stations, terrestrial static laser scanners, airborne lidar, mobile lidar and aerial photography. These technologies combined provide a powerful solution for any for any size project or operation. EPA's competitive edge ahead is further advanced by geological, mine planning and technical services, employing the latest technologies with a geo-logging wireline unit and a Cesium Vapour Magnetometer. Qualified surveyors, highly skilled and technically trained staff complement the technology to form an effective and fully integrated solution offered to the mining, construction and engineering industries.

## Fibertex Geotextiles Africa

Booth 56

When it comes to supplying needle punched non wovens and geosynthetic products for the construction industry, Fibertex Geotextiles Africa makes the perfect match. Fibertex manufactures a full range of polyester and polypropylene geotextiles locally and partners with a host of accredited suppliers worldwide to provide products and solutions for all your project requirements.

The most common applications being:

- subsoil drainage and filtration
- separation and reinforcement
- road and pavement rehabilitation
- erosion control and earth retention
- water and waste containment.

Whether you are consulting engineer, a contractor or a DIY person, we have a product suitable for your needs.

## GIBB

Booth 49

GIBB is a leading multi-disciplinary engineering consulting firm based in South Africa with 67% Black ownership. The firm has a strong African orientation with a wide geographical footprint on the continent. The firm has been operating since 1956 and has proven capabilities in delivering world-class projects of any magnitude. GIBB prides itself on delivering high quality projects underpinned by an independently certified ISO 9001 quality system since 1999.

GIBB has, over the years, developed an in-depth understanding of the challenges of developing infrastructure in Africa. This has contributed to the firm's position as the partner of choice for the private sector, state owned enterprises (SOE) and governments who seek knowledgeable people, with proven experience and the expertise to respond to the numerous infrastructure demands and needs of the continent.

### Herrenknecht AG

Booth 57 & 58

Herrenknecht AG, located in Germany, is a technology and market leader in mechanized tunneling. As the only company worldwide, Herrenknecht delivers cutting-edge tunnel boring machines for all ground conditions and with all diameters – ranging from 0.10 to 19 meters. The Herrenknecht product range includes tailor made machines for traffic and transport tunnels (traffic tunneling) and supply and disposal tunnels (utility tunneling). The company also provides state-of-the-art deep drilling rigs to bore to a depth of 8 000 meters and mechanized excavation technologies for mining.

### i@Consulting

Booth 50 & 51

i@Consulting is a leading specialist in providing infrastructure asset management (IAM) solutions. It prepared national IAM guidelines for local government and has been recognised for its inputs to international documents including the IIMM and ISO 55000 for asset management. The company has assisted dozens of organisations in South Africa over the past nine years to develop a sound framework for the management of their infrastructure and property assets – including metros and other local government clients, where the challenges can be acute and are often complex. The company addresses the need for improved management practices at the strategic, tactical and operational levels of the organisation, across all technical sectors, embracing corporate risk, financial and performance management. Models are established that are scalable, providing the opportunity for progressive practice improvement and building competency over time. i@Consulting has been responsible for training hundreds of municipal officials in IAM, as well as many others through material available for use by IMESA.

Appropriate solutions are crafted through the combined expertise of the company's engineers, management consultants, asset management specialists, trainers, accountants, financial planners, urban planners and economists, data analysts, systems experts and GIS specialists – all available under one roof.

### LW Tank Systems

Booth 73

LW Tank Systems is a leading manufacturer of Air Valves and Break Pressure Tanks to the industrial and civil markets within Africa. LW Tank Systems have a broad installation base and are approved by many municipalities and water boards within South Africa. The company was founded by James Miller in 2002 and continually strives to improve on its innovations and engineering capabilities, thus producing hard-working products that meet the critical requirements associated with Water Pipelines and Water Reticulation systems. Our products are designed and manufactured with quality as a priority, and

incorporate many unique design features, simple maintenance, and reliable service. At LW Tanks we concentrate on designing, manufacturing and marketing advanced products. That is why we can honestly claim: innovation and quality are synonymous with LW Tank Systems.

## Odour Control Group

Booth 42

Malodours arise as byproducts of production and waste handling processes. Since odour control solutions can be capital intensive coupled with the treatment of complex and often open systems, the implementation of ill-conceived solutions invariably result in disappointment. The OCG was established to provide well engineered and pedigreed odour control solutions to effectively handle these issues. The members of the OCG specialize in the design, installation and maintenance of odour control systems for municipal, industrial and commercial applications. The Group also offers emergency and temporary odour control treatments.

### Robor

**Booth 55 & 70**

Robor manufactures and supplies welded steel tube and pipe, precision tube, pipe systems, galvanizing services, scaffolding, structural solutions, carbon steel coil, plate, sheet, structural profiles and cold formed and rolled steel profiles, and many other value added services. Robor supplies coated and uncoated steel pipe, innovative jointing systems, fittings, flanges, couplings and pressure couplings for the successful installation of complete pipelines. Robor's answer to abrasive and erosive water challenges such as coarse mine water and Hydro transport pipelines, is our STEEL POLYPIPE product. Robor utilises corrosion protection, abrasion and cathodic protection, as well as additional products that add a longer lifespan and functionality to pipelines.

**SMEC South Africa is a professional services firm that provides high-quality consultancy services on major infrastructure projects in the following sectors:**

- Roads and Highways
- Power and Energy
- Hydro-power, Dams and Tunnels
- Water and Environment
- Structures
- Rail
- Social Development and Advisory Services
- Construction and Pavements
- Urban Development
- Mining, Oil and Gas

SMEC South Africa forms part of the SMEC Group, which employs more than 5,100 people in an established network of more than 70 offices worldwide.

## SBS Tanks

Booth 76

SBS Water Systems, the company who introduced Zinalume tanks to the South African marketplace in 1998, is the proud manufacturer of SBS Tanks, a premium liquid storage solution. SBS Tanks are proven reliable in the municipal, mining, fire, food and beverage and many more industries. The SBS range of tanks has been designed and developed from over 15 years practical experience in the water storage industry. SBS Tanks range boasts capacities from 12 kℓ right up to the impressive 3.3 ML liquid storage tank.

## WAMTechnology

Booth 60

WAMTechnology is a provider of technology solutions to clients operating in the water and health sectors. Our clients range from the private to public sectors, locally and internationally.

Our flagship product, the Municipal Assistant System, is a software tool developed to assist in the operational management of municipal assets, maintenance, operations, water demand and quality.

The system caters for all five asset classes relevant at municipalities, e.g. wastewater, water treatment, roads, electricity and solid waste. The services we offer include asset assessment, pipeline profiling, hydraulics, preventive and reactive maintenance scheduling, water quality compliance reporting, staff management and others.

## Wasteman Sight Lines

Booth 63

Wasteman Sight Lines has been the industry leader in pipe inspection, condition assessment, pipe cleaning and data management since 1993. We have recently taken the next step in acquiring the ability to do 360° inspections. The integrated system of Sonar, Laser and CCTV gives an accurate electronic measurement of the pipeline, profiling the pipeline both above and below the water level. This Multi-sensor unit also has a HD CCTV camera to visually record video inside the pipeline. Large outfall sewers and siphons can now be inspected without the need for plugging and over pumping.

## Water Research Commission

Booth 30

The Water Research Commission's (WRC) mandate is to support water research and development as well as the building of a sustainable water research capacity in South Africa.

The WRC serves as the country's water-centred knowledge 'hub' leading the creation, dissemination and application of water-centred knowledge, focusing on water resource management, water-linked ecosystems, water use and waste management and water utilisation in agriculture. Being an innovative organization, the WRC is continuously providing novel ways of packaging and transferring knowledge into technology-based products for the water sector and the community at large, both locally and globally.
