

PLATINUM

Aurecon

Aurecon is a leading engineering, management, and specialist technical services consultancy with its roots firmly established in South Africa. A Level 2 Contributor to BBBEE, Aurecon has a large network of experts across the country and throughout Africa. In 15 years, South Africa will cross over the 70% urbanisation rate and, as a continent, we'll leap from one third to one half of all Africans being city dwellers. However, as it stands, 60% of all urban Africans live in slums. We are left with a choice – either allow the urbanisation of poverty and the reinforcement of discrimination to continue, or allow our cities to thrive and our people to reap the urban dividend of jobs and services and lifestyle choices.

In response to this challenge, Aurecon, at this year's IMESA conference, proudly launches Our African City. We are committed to applying our expertise to the transformation of our country and ultimately our continent. Our African City is a dialogue to foster collaboration between the political, financial, technical, and social spheres of society to rethink urban infrastructure planning and governance. The challenge is in how to incorporate the legacies of urban design while responding to new technologies, best practice, and African needs. While learning from the planning mistakes and successes in other parts of the world, we need

to develop the required thought leadership, innovation, and high-level planning integration to socially and economically transform our cities. We must encourage the adoption and proliferation of rigorous methods to develop, evaluate, and evolve future infrastructure architectures.

As Aurecon, we have embraced inclusive urban transformation in South Africa by channelling our experience and knowledge into the 8 levers of expertise that our cities need, to comply with the Integrated Urban Development Framework. Aurecon has been involved in numerous strategic projects that are keeping us at the forefront of technical infrastructure advisory services and driving our learning curve on inclusive urban development and transformation. Recent projects include: the Ekurhuleni Aerotropolis Masterplan, the City of Johannesburg Corridors of Freedom project, and the Luanda City Strategic Masterplan. Our African City is not a static concept but an evolving base of knowledge, new ideas, and new learning based on the reality of what our cities are and the vision we must all partner on to co-create. We invite all stakeholders to contact us to join the dialogue on the various platforms being launched.

Hatch Goba & the Hatch Group of Companies

Hatch Goba (a member of the Hatch Group of Companies) is an employee-owned, multidisciplinary professional services firm. We offer a comprehensive array of technical and strategic services to the mining and metals, energy, and infrastructure sectors. Our services include engineering, procurement and construction management, information technology, process development and technologies, operational performance, environmental services, and management consulting.

The Hatch Group has served clients for over 80 years and has project experience in more than 150 countries around the world. With 10000 employees globally, we have more than \$35 billion in projects currently under management. Locally, Hatch Goba employs approximately 1100 personnel in

South Africa, and operates from four regions with six principal offices in Gauteng, KwaZulu-Natal, Eastern Cape, and Western Cape. These offices are supplemented by regional satellite and project-based offices in various centres throughout Africa. Our focus is to provide a more integrated service to our three business sectors while ensuring that world-class project management practices are combined with a deep level of understanding of the local environment to produce excellence for both our public and private sector clients.

i@Consulting (Pty) Ltd

i@Consulting (Pty)Ltd was established in 2001 with a focus on infrastructure management and the built environment. It is recognised as a leader in the field of infrastructure asset management in the public sector, employing state-of-the-art technology and methodologies, and working in partnership with clients to solve complex problems. The company offers integrated services through a team with engineering, accounting, management consulting, project management, property valuation, GIS, and data management skills available under one roof, which has a proven track record of successful delivery.

We provide strategic, advisory, and capacity building services in asset management to National Treasury, the South African Cities Network, the World Bank, the Financial and Fiscal Commission, the Development Bank of Southern Africa, CoGTA (Department of Cooperative Governance and Traditional Affairs), the Department of Water and Sanitation (for which we prepared an asset register and valuation for the water resource infrastructure across the whole country), the Swedish Institute of Water Infrastructure, and others. We provide direct asset management support to dozens of municipalities all over South Africa, including several metropolitan municipalities where, as with some other local government clients, the challenges can be acute and are often complex.
